RealEstateManager

Training Workbook

Practice transactions for new users —
step by step, with the result to expect

Leases | Invoices & Receipts | PDC Cheques | Supplier Bills | Petty Cash & Journals | Fixed Assets | Landlord Settlements | Month-End Closing

For: new leasing staff, accountants and supervisors, working in a practice company

Assumes: the company, chart of accounts and master data are already set up — see the User Manual

Edition: November 2026

Contents

BEFORE YOU START

0.1 How to use this workbook

0.2 The practice company

0.3 Draft, Post and Journal Inquiry

1 · LEASING

T1 Commercial lease, activated at once

T2 Residential lease through approval

T3 Managed property lease

T4 Print the contract and its QR label

2 · TENANT RECEIVABLES

T5 Post and print a rent invoice

T6 Credit note for a rent discount

T7 Receipt by bank transfer

T8 Part payments

T9 Receive post-dated cheques

T10 Clear a cheque and correct one

T11 Security deposit

T12 Tenant request: more time to pay

3 · SUPPLIER PAYABLES

T13 Bill from a VAT-registered supplier

T14 Bill from an unregistered supplier

T15 Correct a posted bill

T16 A late bill for a closed month

T17 Pay suppliers

4 · CASH AND GENERAL LEDGER

T18 Petty cash float

T19 Annual insurance as a prepayment

T20 Manual journals

T21 Owner withdrawal

T22 Fixed asset: buy, capitalise, depreciate

5 · LANDLORDS

T23 Commission tax invoices

T24 Pay the landlord

6 · MONTH-END AND YEAR-END

T25 Close the month in the Closing Cockpit

T26 Reopen a closed month on request

T27 VAT return and VAT payment

T28 Check the reports

T29 Year-end close

7 · ADVANCED (OPTIONAL)

T30 Development project costs

T31 Sell a unit

8 · MAINTENANCE, OWNERS AND DOCUMENTS

T32 Set up the maintenance team and complete a job

T33 Maintenance on hold for a tenant with an overdue invoice

T34 Read the Maintenance Dashboard

T35 Invoice a managed property in the owner's name

T36 The owner's results: statement and profitability

T37 Keep a tenant's Emirates ID and passport

T38 Attach the attested contract

T39 Read a scanned supplier invoice

T40 Let the AI Assistant do the typing (optional)

APPENDICES

A Messages you may see

B Trainee progress record

BEFORE YOU START

0.1 How to use this workbook

Each scenario is a real piece of work you will do in your job, written as a short exercise. Do them **in order**: later scenarios use the leases, invoices and bills created by earlier ones, and the figures to expect assume you did.

- **Work in the practice company**, never the live one. Check the company name at the top right of every screen before you start.
- **Menus are written as paths**: **Operations ▸ Customer Receipts** means open the *Operations* menu and choose *Customer Receipts*. Buttons are shown like **Save and Post**.
- **Dates.** "*Day 1*" means the first day of the current month, "*Day 10*" the tenth, and "*month end*" its last day. Use the current year.
- **Each scenario ends with the result to expect**, usually the journal entry. Open **Operations ▸ Journal Inquiry** and compare. If your figures differ, find out why before moving on — that is where the learning is.
- **Two people** are needed for the approval scenarios (T2 and T26): the trainee, and a trainer holding the approval permission. Nobody can approve their own work.
- The trainer signs each scenario off at the bottom of its box, and the record in Appendix B.

ON A PHONE

The workbook can be read on a phone, but enter the transactions on a computer: the forms have many fields. Wide tables scroll sideways inside their box.

0.2 The practice company

Your trainer will have created these records. Ask for them if any is missing; setting them up is covered in the User Manual.

PROPERTIES AND UNITS

Property	Ownership	Unit	VAT	Notes
Marina Heights	Owned	Office 301	Standard 5%	Commercial offices
Palm Residences	Owned	Apartment 704	Exempt	Residential, not a new building
Garden Villas	Managed	Villa 12	Exempt	Landlord: Khalid Rahman · Commission 5%

TENANTS

Tenant	Type	Notes
Al Noor Trading LLC	Company	Has a TRN on file
Sara Ahmed	Individual	Emirates ID on file
Omar Haddad	Individual	Emirates ID on file

VENDORS

Vendor	VAT registered	Used in
Coastal Facility Services LLC	Yes, with TRN	T13, T17
Quick Fix Plumbing	No	T14, T15, T17
Gulf Shield Insurance	Yes, with TRN	T19
PowerGen Equipment Trading	Yes, with TRN	T22

ACCOUNTS YOU WILL MEET

Code	Account	Code	Account
11100	Cash and Cash Equivalents (bank)	21300	Tenant Security Deposits
11150	Petty Cash (float)	21400	VAT Payable
11200	Accounts Receivable	21500	Due to Landlords
11300	VAT Recoverable	21600	PDC Contra
11400	PDC On Hand	34100	Owner's Current Account
11500	Prepaid Expenses	41100	Rental Revenue – Owned
15200 / 15300	Fixed Assets / Accumulated Depreciation	42100	Management Fee Revenue
15400	Fixed Asset Clearing	51100	Property Operating Expenses
21100	Accounts Payable	52100	Property Maintenance
21200	Advances from Customers (unearned rent)	61100 / 62100 / 63100	Administrative / Depreciation / Finance Costs

0.3 Draft, Post and Journal Inquiry

Every transaction produces a journal entry. A **draft** journal is not in any report; a **posted** one is. Some screens post at once, others leave a draft you post yourself.

Screens	What saving does
Customer Invoices, Vendor Bills, Credit Notes	The `Post` button builds and posts the journal in one click.
Receipts, PDCs, Security Deposits, Vendor Payments, Petty Cash, Owner Withdrawals	`Save and Post` posts at once. If it is refused, a yellow message says why and the entry stays a draft.
Manual Journals, Revenue Recognition, Prepayments	Saving creates a draft. Post it from **Operations ▸ Journal Inquiry**.
Fixed Assets	Posted immediately.

TO POST DRAFTS

Operations ▸ Journal Inquiry → set *Posted Only* to *No* → `Go` → `Post` on one entry, or `Post All Drafts` for everything in the filter.

MODULE 1

Leasing

The lease drives everything else: when it takes effect it creates every rent invoice for its term and the month-by-month revenue plan.

T1 Commercial lease, activated at once

Role: Leasing officer **Menu:** Master Data ▸ Leases **Time:** 10 min

Al Noor Trading LLC signs a one-year lease of Office 301, paying quarterly.

PRACTICE DATA

Unit: Marina Heights – Office 301 · Tenant: Al Noor Trading LLC · Start: Day 1 · End: one year later, less one day · Annual rent: 120,000 · Billing: Quarterly · Security deposit: 10,000

1. Open **Master Data** ▸ **Leases** and select **Create Lease**.
2. Choose the *Unit* and the *Tenant*.
3. Enter the *Start Date*, *End Date* and *Annual Rent*.
4. Set the *Billing Frequency* to *Quarterly*.
5. Check the VAT treatment shown: it should be *Standard 5%* from the unit. Do not override it.
6. Enter the *Security Deposit Amount* 10,000.
7. Select **Save and Activate**. (If your company requires approval, use **Save and Submit for Approval** and ask the trainer to approve, as in T2.)

EXPECTED RESULT

- The lease is *Active* with a generated contract code such as …-`U301-C001-2026`. The unit is *Occupied*.
- **Operations** ▸ **Customer Invoices** shows **4 draft invoices** of 30,000 + 1,500 VAT = **31,500**, dated Day 1 and every three months after.
- **System Setup** ▸ **Revenue Recognition** shows **12 planned entries of 10,000**, one at each month end.
- No journal yet: a lease is not a transaction.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T2 Residential lease through approval

Role: Leasing officer + approver **Menu:** Master Data ▸ Leases, Master Data ▸ Approvals **Time:** 15 min

Sara Ahmed rents Apartment 704. Contract approval is switched on, so a second person must approve. The approver first sends it back once.

PRACTICE DATA

Unit: Palm Residences – Apartment 704 · Tenant: Sara Ahmed · Start: Day 1 · One year · Annual rent: 72,000 · Billing: Quarterly · Deposit: 5,000 (typed wrongly first as 50,000)

1. **Trainee:** create the lease as in T1, but enter the deposit as 50,000, and select **Save and Submit for Approval**.
2. **Approver:** open **Master Data** ▸ **Approvals**, open the request and read the terms and the invoices it will create.
3. **Approver:** select *Return to creator* with the reason "Deposit should be 5,000".

4. **Trainee:** the lease is back in *Draft*, marked *Returned* with the reason. Edit it, correct the deposit to 5,000, and select `Submit for approval`.
5. **Approver:** approve it.
6. **Trainee:** try to approve your own lease next time — the system refuses (four-eyes rule).

EXPECTED RESULT

- The lease is *Active*. The history at the bottom shows the submission, the return with its reason, and the approval.
- 4 draft invoices of **18,000** with **no VAT** (exempt residential), and 12 planned recognition entries of **6,000**.

☐ Done Trainee: _____ Approver: _____ Date: _____

T3 Managed property lease

Role: Leasing officer **Menu:** Master Data ▸ Leases **Time:** 10 min

We manage Villa 12 for its landlord. The rent belongs to the landlord; only our 5% commission is our income.

PRACTICE DATA

Unit: Garden Villas – Villa 12 · Tenant: Omar Haddad · Start: Day 1 · One year · Annual rent: 90,000 · Billing: Semi-Annual · Deposit: none

1. Create and activate the lease as in T1.
2. Open **System Setup** ▸ **Revenue Recognition** and find the lease's entries.

EXPECTED RESULT

- 2 draft invoices of **45,000** (no VAT), dated Day 1 and six months later.
- 12 planned recognition entries of **375** each: 90,000 ÷ 12 × 5%. Only the commission becomes our revenue.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T4 Print the contract and its QR label

Role: Leasing officer **Menu:** Master Data ▸ Leases **Time:** 5 min

1. On Al Noor's lease row, select `Draft Contract`. It opens in a new tab; print it or save it as PDF.
2. Select `QR Label` and print the label for the contract file.

EXPECTED RESULT

A full tenancy agreement filled in from the lease (parties, premises, rent, payment schedule, deposit), and a label showing the contract code and a QR code.

☐ Done Trainee: _____ Trainer: _____ Date: _____

MODULE 2

Tenant receivables

Invoices are created by the lease; your job is to post them when due, correct them with credit notes, and record what the tenants pay.

T5 Post and print a rent invoice

Role: Accountant **Menu:** Operations ▸ Customer Invoices **Time:** 10 min

1. Open **Operations ▸ Customer Invoices**.
2. Find the **Day 1** invoice of each of the three leases (Al Noor 31,500 · Sara 18,000 · Omar 45,000).
3. Select **Post** on each. The status becomes *Posted*.
4. On Al Noor's invoice select **Tax Invoice**; on Sara's, **Invoice**. Compare the two documents.
5. Leave the later invoices as drafts: they are posted when they fall due.

EXPECTED RESULT — AL NOOR (OWNED, STANDARD RATED)

Account	Debit	Credit
11200 Accounts Receivable	31,500.00	
21200 Advances from Customers		30,000.00
21400 VAT Payable		1,500.00

Sara's invoice has no VAT line. Omar's credits **21500 Due to Landlords** 45,000 instead of 21200, because the rent is the landlord's. Al Noor's is a *full tax invoice* showing both TRNs; Sara's is a plain *invoice* because exempt rent carries no VAT.

WHY NO REVENUE?

Billing is not earning. The invoice creates a receivable and unearned rent. Revenue arrives month by month through revenue recognition (T25).

☐ Done Trainee: _____ Trainer: _____ Date: _____

T6 Credit note for a rent discount

Role: Accountant **Menu:** Operations ▸ Customer Invoices **Time:** 10 min

Office 301 was handed over three days late; management agrees a discount of 1,000 plus VAT on the first invoice.

1. On Al Noor's Day 1 invoice, select **Credit Note**.
2. *Credit note date*: Day 5. *Reason*: choose the discount reason from the list. *Explanation*: "Discount for late handover of Office 301".
3. *Net amount*: 1,000. VAT of 50 is calculated for you.
4. Leave *Reverse into account* as it is, and select **Save & Post**.

EXPECTED RESULT

Account	Debit	Credit
21200 Advances from Customers	1,000.00	
21400 VAT Payable	50.00	
11200 Accounts Receivable		1,050.00

The invoice now shows 1,050 credited and a balance of **30,450**.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T7 Receipt by bank transfer

Role: Accountant **Menu:** Operations ▸ Customer Invoices / Customer Receipts **Time:** 5 min

Al Noor transfers the balance of its first invoice.

1. On Al Noor's Day 1 invoice, select **Receive Payment**. The receipt form opens on that invoice and shows the outstanding 30,450.
2. *Receipt Number*: RCPT-T7 · *Receipt Date*: Day 6 · *Amount*: 30,450 · *Payment Method*: Bank Transfer.
3. Select **Save and Post**.

EXPECTED RESULT

Account	Debit	Credit
11100 Cash and Cash Equivalents	30,450.00	
11200 Accounts Receivable		30,450.00

The invoice is *Paid*.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T8 Part payments

Role: Accountant **Menu:** Operations ▸ Customer Receipts **Time:** 10 min

Omar Haddad pays his first semi-annual invoice of 45,000 in two transfers.

1. Select **New Receipt**, choose Omar's Day 1 invoice, receipt number RCPT-T8A, date Day 3, amount **20,000**, Bank Transfer, **Save and Post**.
2. Check the invoice: status *PartiallyPaid*, balance 25,000.
3. Record a second receipt RCPT-T8B on Day 12 for **25,000**.
4. Try a third receipt of 1 against the same invoice — it is no longer offered, because nothing is outstanding.

EXPECTED RESULT

Two journals, each Dr 11100 / Cr 11200. The invoice is *Paid*.

ONE RECEIPT, ONE INVOICE

If a tenant pays several invoices with one transfer, enter one receipt per invoice with the same date and reference.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T9 Receive post-dated cheques

Role: Accountant / cashier **Menu:** Operations ▸ PDC Receipts **Time:** 15 min

Sara Ahmed hands over four cheques, one for each quarterly invoice.

PRACTICE DATA

Cheque no.	Bank	Cheque date	Against invoice	Amount
100201	Emirates Practice Bank	Day 1	1st quarter	18,000
100202	Emirates Practice Bank	Day 1 + 3 months	2nd quarter	18,000
100203	Emirates Practice Bank	Day 1 + 6 months	3rd quarter	18,000
100204	Emirates Practice Bank	Day 1 + 9 months	4th quarter	18,000

Received date for all four: Day 1.

1. Open **Operations** ▸ **PDC Receipts** and select **Receive PDC**.
2. Choose Sara's lease and *Settlement Mode* **Receivable**, then the 1st-quarter invoice.
3. Enter the cheque number, bank, *Received Date* Day 1, *Cheque Date* and amount. Select **Save and Receive**.
4. Repeat for the other three cheques, each against its own invoice.

EXPECTED RESULT — EACH CHEQUE

Account	Debit	Credit
11400 PDC On Hand	18,000.00	
21600 PDC Contra		18,000.00

A memorandum pair dated on the *received* date: it shows the cheques you hold without touching cash or receivables. Status *Received*.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T10 Clear a cheque and correct one

Role: Accountant **Menu:** Operations ▸ PDC Receipts **Time:** 10 min

1. The bank honours cheque 100201. Select **Clear** on it, enter *Cleared Date* Day 4 and save.
2. You notice cheque 100204 was keyed with the wrong cheque date. Select **Edit** on it, correct the cheque date by one day, and save.
3. Try to clear cheque 100202 today. Read the warning: the cheque date is months away and a bank will not normally honour it early. **Cancel.**

EXPECTED RESULT — CLEARING 100201

Account	Debit	Credit
21600 PDC Contra	18,000.00	
11400 PDC On Hand		18,000.00
11100 Cash and Cash Equivalents	18,000.00	
11200 Accounts Receivable		18,000.00

The cheque is *Cleared* and Sara's first invoice is *Paid*. The other three cheques stay *Received*.

DEPOSITING CHEQUES AT THE BANK FIRST

When you send cheques to the bank for collection, use **Deposit** before clearing: the cheque moves to 11450 Cheques Under Collection and the tenant is credited. From there it is cleared or recorded as *Bounced*. See *PDC Receipts* in the User Manual.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T11 Security deposit

Role: Accountant **Menu:** Operations ▸ Security Deposits **Time:** 5 min

1. Select **Receive Deposit** and choose Al Noor's lease.
2. *Reference Number*: DEP-T11 · *Receipt Date*: Day 2 · *Payment Method*: Bank Transfer · *Amount*: 10,000.
3. Select **Save and Post**.

EXPECTED RESULT

Dr 11100 Cash 10,000 · Cr **21300 Tenant Security Deposits** 10,000. A deposit is a liability, never income.

NEVER AS A CUSTOMER RECEIPT

A deposit entered as a receipt would reduce the tenant's rent balance and end up as revenue.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T12 Tenant request: more time to pay

Role: Tenant services **Menu:** Operations ▸ Tenant Requests **Time:** 10 min

Using the tenant portal (your trainer gives you Sara's practice sign-in), Sara asks to pay her 2nd-quarter invoice 15 days late.

1. **As the tenant**, in the portal, raise a *payment postponement* request on the 2nd-quarter invoice with the new date.
2. **As staff**, open **Operations ▸ Tenant Requests** and select **Open** on it.
3. Set the status to *Acknowledged*, add an *Internal note* "Good payment history", and **Save update**.
4. Set *Resolved* with the response "Agreed, you may pay by <new date>".
5. Select **Apply new due date to INV-...** and confirm.
6. Set the request to *Closed*.

EXPECTED RESULT

Only the invoice's due date changes. No journal, no amount, no VAT moves. The tenant sees the reply in the portal but never the internal note.

☐ Done Trainee: _____ Trainer: _____ Date: _____

MODULE 3

Supplier payables

A bill records what you owe a supplier. VAT depends on whether the supplier is registered, and how much you can reclaim depends on what each line was for.

T13 Bill from a VAT-registered supplier

Role: Accountant **Menu:** Operations ▸ Vendor Bills **Time:** 15 min

Coastal Facility Services invoices this month's cleaning for two buildings on one document.

PRACTICE DATA

Supplier's bill no. CFS-5510 · Category: Building cleaning · Bill date and accounting date: Day 8 · Due: 30 days later

Line	Account	Property	Qty × price	Taxable	Attribution
Lobby and office cleaning	51100	Marina Heights	1 × 4,000	Yes	Taxable
Stairwell cleaning	51100	Palm Residences	1 × 2,000	Yes	Exempt

1. Select **New Bill** and choose the supplier. A blue banner says *Tax Invoice — 5% VAT applies*.
2. Enter the supplier's bill number, category and dates.
3. Enter the two lines as above; use **+ Add line** for the second. Watch the totals update.
4. Select **Save Draft**, review, then **Post**.
5. Select **Print** to see the bill document with the signature strip.

EXPECTED RESULT

Account	Debit	Credit
51100 · Marina Heights	4,000.00	
51100 · Palm Residences (2,000 + irrecoverable VAT 100)	2,100.00	
11300 VAT Recoverable	200.00	
21100 Accounts Payable		6,300.00

VAT on the residential line cannot be reclaimed, so it is added to that line's cost. Your own bill number (BILL-...) is issued on saving.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T14 Bill from an unregistered supplier

Role: Accountant **Menu:** Operations ▸ Vendor Bills **Time:** 5 min

PRACTICE DATA

Quick Fix Plumbing · Bill QF-118 · Day 9 · One line: "Leak repair, Apartment 704", account 52100, Palm Residences, 1 × **850**

1. Select **New Bill** and choose Quick Fix Plumbing. An amber banner says *Commercial Invoice — no VAT* and the VAT controls switch off.
2. Enter the details and line, **Save Draft**, then **Post**.

EXPECTED RESULT

Dr 52100 Property Maintenance (Palm Residences) 850 · Cr 21100 Accounts Payable 850. No VAT line at all.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T15 Correct a posted bill

Role: Accountant **Menu:** Operations ▸ Vendor Bills **Time:** 5 min

Checking the paperwork, you see the plumber's bill was 950, not 850.

1. On bill QF-118 select **Reset**. The journal leaves the accounts and the bill becomes editable.
2. Edit the line price to 950 and save.
3. Select **Post** again.

EXPECTED RESULT

One journal of 950 in the accounts. Journal Inquiry shows it posted once; the 850 version no longer counts anywhere.

WHEN RESET IS REFUSED

A bill cannot be reset once a payment is posted against it, or if its period is closed. Reset the payment first, or post a correcting journal in an open month.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T16 A late bill for a closed month

Role: Accountant **Menu:** Operations ▸ Vendor Bills **Time:** 5 min

Coastal sends last month's window cleaning (bill CFS-5490, 1,000 + VAT, Marina Heights, taxable) after last month was closed.

1. Create the bill with *Bill Date* = the date on the supplier's document (last month).
2. Try to save with *Accounting Date* also last month and **Post**: it is refused because the period is closed.
3. Set the *Accounting Date* to Day 10 of this month, and post.

EXPECTED RESULT

The journal lands in this month (Dr 51100 1,000 · Dr 11300 50 · Cr 21100 1,050). The supplier's date is still printed on the bill.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T17 Pay suppliers

Role: Accountant **Menu:** Operations ▸ Vendor Payments **Time:** 10 min

1. Select **New Vendor Payment**, choose bill CFS-5510 (outstanding 6,300). Payment number PAY-T17A, Day 15, amount **3,000**, Bank Transfer, **Save and Post**.
2. Pay the remaining **3,300** with PAY-T17B on Day 25.
3. Pay QF-118 in full (950) with PAY-T17C on Day 15.
4. Try to pay a *draft* bill: it is not offered — post the bill first.

EXPECTED RESULT

Each payment: Dr 21100 Accounts Payable · Cr 11100 Cash. CFS-5510 goes *PartiallyPaid* then *Paid*; QF-118 is *Paid*. **Reporting** ▸ **Vendor Statement** for Coastal shows 6,300 billed and 6,300 paid for CFS-5510.

☐ Done Trainee: _____ Trainer: _____ Date: _____

MODULE 4

Cash and general ledger

T18 Petty cash float

Role: Site administrator / accountant **Menu:** Operations ▸ Petty Cash **Time:** 15 min

1. Choose the float 11150 Petty Cash at the top of the screen. Note its current balance.
2. Select **New Expense Voucher**: Day 11, paid to "City Hardware", "Cleaning supplies", expense 51100, property Marina Heights, amount **120**, reference receipt no. 7781. **Post Voucher**.
3. Try a voucher larger than the float balance. It is refused: "This voucher would take the float below zero". Cancel it.
4. Select **Replenish Float**: Day 12, funding account 11100, amount **2,000**, reference TRF-T18. **Post Replenishment**.
5. Add a second voucher: Day 13, "Speedy Couriers", courier fees, expense 61100, amount **45**.
6. Select **Refresh**, then **Print** the petty cash report and compare its closing balance with a pretend cash count.

EXPECTED RESULT

Closing balance = starting balance − 120 + 2,000 − 45. Vouchers: Dr expense · Cr 11150. Replenishment: Dr 11150 · Cr 11100 — a transfer, not an expense.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T19 Annual insurance as a prepayment

Role: Accountant **Menu:** System Setup ▸ Recurring Prepayments **Time:** 10 min

The building insurance for the next 12 months costs 12,000, billed by Gulf Shield Insurance on credit.

1. Select **New Prepayment Setup**.
2. *Description*: "Building insurance – 12 months" · *Payment Date*: Day 1 · *Total Amount*: 12,000.
3. *First Recognition Date*: this month end · *Recognition Months*: 12.
4. *Prepaid Account*: 11500 · *Expense Account*: 51100 · *Offset Account*: 21100 Accounts Payable, with the vendor Gulf Shield Insurance.
5. **Save Prepayment Setup**, then post the draft set-up journal from Journal Inquiry.

EXPECTED RESULT

Set-up: Dr 11500 Prepaid Expenses 12,000 · Cr 21100 Accounts Payable 12,000, with a bill raised for the vendor. The schedule shows 12 monthly amounts of **1,000**, released at month end (T25).

☐ Done Trainee: _____ Trainer: _____ Date: _____

T20 Manual journals

Role: Accountant **Menu:** Operations ▸ Manual Journals **Time:** 15 min

Three entries no other screen makes. For each: **New Manual Journal**, enter the *Entry Date* and a description someone else will understand, add the lines, **Save as Draft**, then post from Journal Inquiry.

#	Date	Description	Debit	Credit	Amount
a	Day 20	Bank charges for the month, statement ref BS-T20	63100 Finance Costs	11100 Cash	75
b	Month end	Accrual: common-area electricity, Marina Heights, bill not yet received	51100 (unit: Office 301)	21100 Accounts Payable	1,800
c	Day 21	Try an unbalanced entry: Dr 63100 100, Cr 11100 90	—	—	—

EXPECTED RESULT

Journals (a) and (b) are posted. Entry (c) is refused with "Journal entry is not balanced" — debits must equal credits.

WRITE THE DESCRIPTION FOR AN AUDITOR

"Accrual: common-area electricity, Marina Heights, bill not yet received" explains itself in six months; "accrual" does not.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T21 Owner withdrawal

Role: Accountant **Menu:** Operations ▸ Owner Withdrawals **Time:** 5 min

The owner pays private school fees of 5,000 from the company bank account.

1. Enter *Date* Day 14 and *Amount* 5,000.
2. *Spent on*: the Education category · *Paid from*: 11100.
3. Description "School fees – term 1", reference TRF-T21, **Save and Post**.

EXPECTED RESULT

Dr 34100 Owner's Current Account (category Education) 5,000 · Cr 11100 5,000. No expense account is touched, so company profit does not change.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T22 Fixed asset: buy, capitalise, depreciate

Role: Accountant **Menu:** Operations ▸ Fixed Assets **Time:** 20 min

A standby generator is bought for Marina Heights: 60,000 from PowerGen on credit, plus 3,000 installation paid from the bank.

1. Select **Add Fixed Asset**: code FA-GEN-01, name "Standby generator – Marina Heights", asset account 15200, accumulated depreciation 15300, useful life **120** months, depreciation start Day 1, property Marina Heights. Save.
2. Select **Acquisition** on the asset. **Add Cost**: supplier invoice, 60,000, capitalisable, offset Accounts Payable with vendor PowerGen.
3. **Add Cost** again: installation, 3,000, capitalisable, offset 11100 Cash.
4. Select **Capitalize Asset**.
5. Open **Depreciation** on the asset and look at the schedule. (It is posted at month end in T25.)

EXPECTED RESULT

- Costs: Dr 15400 Fixed Asset Clearing 60,000 / Cr 21100 (a vendor bill is raised), and Dr 15400 3,000 / Cr 11100.
- Capitalisation: Dr 15200 Fixed Assets **63,000** · Cr 15400 63,000.
- Schedule: 120 instalments of **525** (63,000 ÷ 120).

☐ Done Trainee: _____ Trainer: _____ Date: _____

MODULE 5

Landlords of managed properties

For Villa 12 we collect rent for the landlord, keep our 5% commission plus its VAT, and pay him the rest.

T23 Commission tax invoices

Role: Accountant **Menu:** Operations ▸ Owner Settlements **Time:** 10 min

Do this after the month's revenue recognition has been posted (T25 step 2), which moves the 375 commission into revenue.

1. Under *Commission Tax Invoices*, choose *Month ending* = this month end and select **Check**.
2. Select **Issue Commission Invoices**.
3. Select **Invoice** next to Khalid Rahman's and print the tax invoice.

EXPECTED RESULT

One posted tax invoice (TX-... series) for commission 375 plus VAT **18.75**: Dr 21500 Due to Landlords 18.75 · Cr 21400 VAT Payable 18.75. It cannot be reset to draft.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T24 Pay the landlord

Role: Accountant **Menu:** Operations ▸ Owner Settlements **Time:** 10 min

1. Select **Statement & Pay** for Khalid Rahman, with *Statement as at* this month end.
2. Check the statement: rent billed **45,000** · commission 5% **2,250** · VAT on commission **112.50** · owner's share **42,637.50**. Because Omar paid in full (T8), *Available from collections* is also 42,637.50.
3. Under *Pay the Owner* enter 40,000 (a part payment), Day 26, Bank Transfer, paid from 11100, reference TRF-T24.
4. Select **Save and Post Payment** and print the settlement advice that opens.
5. Try to pay another 5,000: it is refused, because the most that can still be paid is 2,637.50.

EXPECTED RESULT

Dr 21500 Due to Landlords 40,000 · Cr 11100 40,000. Settlement number OS-year-0001. The balance payable to the landlord is 2,637.50.

☐ Done Trainee: _____ Trainer: _____ Date: _____

MODULE 6

Month-end and year-end

The Closing Cockpit checks that every recurring process reached the general ledger before a month is locked. Once closed, nothing can be posted, reset or changed in that month.

T25 Close the month in the Closing Cockpit

Role: Accountant / finance supervisor **Menu:** System Setup ▸ Closing Cockpit **Time:** 20 min

In training, close the month you have been working in. Your trainer may first move the practice dates so that the month has ended.

1. Open the cockpit. Select the month's tile. Read every line of its checklist and its light:
   - **Green** — processed and the ledger agrees.
   - **Amber** — review; does not stop the close once you tick that you reviewed it.
   - **Red** — not processed; blocks the close.
   - **Grey** — nothing to do this month.
2. *Revenue recognition* is red: select **Run recognition**. It turns green with **16,375** recognised (10,000 + 6,000 + 375).
3. *Depreciation* is red (the generator): select **Run depreciation**. Green at **525**.
4. *Prepayment amortisation* is red (insurance): select **Run amortisation**. Green at **1,000**.
5. *No draft journals*: if red, read which drafts are listed. Post genuine ones with **Post all drafts**; delete or correct any that should not exist.
6. Read the amber lines (for example cheques due but not cleared). Decide whether each is acceptable.
7. Now do T23 (commission invoices), then return here.
8. When nothing is red, tick *I have reviewed the amber warnings* and select **Close**.
9. Try to post anything dated in that month — a receipt, a journal, a reset. Every attempt is refused.

EXPECTED RESULT

The tile shows a padlock. The period history records who closed it, when, and the warnings acknowledged. The dashboard's *Unclosed Periods* section no longer lists the month.

Month-end entry	Debit	Credit	Amount
Revenue – Al Noor	21200 Advances from Customers	41100 Rental Revenue – Owned	10,000.00
Revenue – Sara	21200 Advances from Customers	41100 Rental Revenue – Owned	6,000.00
Commission – Villa 12	21500 Due to Landlords	42100 Management Fee Revenue	375.00
Depreciation – generator	62100 Depreciation Expense	15300 Accumulated Depreciation	525.00
Insurance – month 1	51100 Property Operating Expenses	11500 Prepaid Expenses	1,000.00

☐ Done Trainee: _____ Trainer: _____ Date: _____

T26 Reopen a closed month on request

Role: Accountant + approver **Menu:** System Setup ▸ Closing Cockpit / Period Reopen Requests **Time:** 15 min

After closing, a supplier's bill for the month turns up that must be in it.

1. **Trainee:** select the closed month's tile. Under *Ask for this period to be reopened*, write a real reason (at least 15 characters), e.g. "Coastal bill CFS-5530 for this month's pest control arrived after closing", and select **Request reopening**.
2. **Approver:** open **System Setup ▸ Period Reopen Requests** (the red badge shows how many wait). Read the reason.
3. **Approver:** first try **Turn down** without a comment — a comment is required. Then add the comment "Approved – post the bill and close again today" and select **Approve & reopen**.
4. **Trainee:** the month shows *Reopened*. Enter and post the bill (500 + VAT, Marina Heights, taxable).
5. **Trainee:** close the month again through the checklist, as in T25.

EXPECTED RESULT

The request shows *Reclosed*. The period history lists: Closed → Reopen requested → Reopened (with reason and approver) → Closed again. The requester could not approve their own request.

☐ Done Trainee: _____ Approver: _____ Date: _____

T27 VAT return and VAT payment

Role: Accountant **Menu:** Reporting ▸ VAT Return, Operations ▸ Manual Journals **Time:** 15 min

1. Open **Reporting ▸ VAT Return** for the current quarter and select **Refresh**.
2. Find each of your documents: Al Noor's invoice (standard), the credit note (*Less credit notes*), Sara's and Omar's invoices (exempt), the commission invoice (*management commission to landlords*), and the bills by attribution.
3. Note *Output Tax Due*, *Input Tax Recoverable* and *Net VAT payable*.
4. Record the payment to the FTA with a manual journal: Dr 21400 VAT Payable (output tax) · Cr 11300 VAT Recoverable (input tax) · Cr 11100 Cash (the net amount). Post it.

EXPECTED RESULT

With only this workbook's documents, output tax is 1,500 − 50 + 18.75 = **1,468.75**; recoverable input tax is the 5% on the taxable bill lines. After the payment journal, 21400 and 11300 are back to zero for the quarter.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T28 Check the reports

Role: Accountant / supervisor **Menu:** Reporting **Time:** 20 min

Open each report for the month you closed and answer the question beside it.

Report	Question to answer
Trial Balance	Do total debits equal total credits?
Profit & Loss	Is rental revenue 16,000 and management fee revenue 375? Where are depreciation and insurance?
Balance Sheet	What does 21200 Advances from Customers hold, and why? What is in 21300?
Tenant Statement — Al Noor	Invoice 31,500, credit 1,050, receipt 30,450: is the balance nil?
Vendor Statement — Coastal	Which bills are still unpaid?
P&L by Property	Which building carries the generator depreciation and the cleaning?
General Ledger — 11100	Can you find every receipt and payment from this workbook?
Owner Withdrawals	Is the 5,000 under Education?

☐ Done Trainee: _____ Trainer: _____ Date: _____

T29 Year-end close

Role: Finance supervisor (trainer demonstrates) **Menu:** System Setup ▸ Closing Cockpit **Time:** 15 min

Done once a year, after all twelve months are closed. The trainer demonstrates it on a practice year.

1. Choose the fiscal year in the cockpit. Under *Year-end close*, read any red lines: every period closed, the previous year closed, the retained earnings account mapped.
2. Review the preview: revenue to clear, expenses to clear, and the net profit or loss going to retained earnings.
3. Select **Close fiscal year** and confirm.
4. Open *Opening balances carried into* the next year and check that debits equal credits.
5. Run the Profit & Loss for the closed year: it still shows the year's result. Run the Balance Sheet one day into the new year: the result now sits in 32100 Retained Earnings.

EXPECTED RESULT

One posted closing entry on the last day of the year: every revenue account debited, every expense account credited, and the difference to 32100 Retained Earnings. Balance sheet accounts carry into the new year unchanged. If any month of that year is later reopened, the year close is undone and must be run again.

☐ Seen Trainee: _____ Trainer: _____ Date: _____

MODULE 7 · OPTIONAL

Development and unit sales

Only for companies that build or sell units. Your trainer will set up a practice project "Creek View" on an owned plot.

T30 Development project costs

Role: Project accountant **Menu:** Operations ▸ Development Projects, Vendor Bills **Time:** 20 min

1. Open the project and compare its budget by cost category with the cost to date.
2. Enter a contractor's certificate as a vendor bill (e.g. 250,000 + VAT). On the line, choose the project and the construction category under *Property*: the account switches to the project's account by itself. Post it.
3. On the project page, use *Record a Cost without a Supplier Bill* for a municipality fee of 15,000 paid from 11100, category permits. **Record and Post**.
4. Check the budget against actual for each category, and the cost ledger.

EXPECTED RESULT

Both costs are debited to the project's work-in-progress account (13100 for sale, 15500 for rental, 15600 own use). Nothing reaches the Profit & Loss while the building is being built.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T31 Sell a unit

Role: Sales administrator + accountant **Menu:** Operations ▸ Unit Sales **Time:** 20 min

1. Select **New Sale Contract**: a completed unit, the buyer, today's date, sale price 900,000 before VAT. Read the VAT treatment and its reason.
2. Select **Split 20 / 30 / 30 / 20** to fill the payment plan, check it adds up to the price including VAT, and **Sign Contract**.
3. Under *Record a Payment*, record the first instalment received by bank transfer. **Record and Post**.
4. When the buyer has paid (or the trainer says so), enter the handover date and select **Hand over**.

EXPECTED RESULT

Before handover, payments sit in 21250 Advances from Unit Buyers. At handover, revenue is recognised in 41200 and the unit's cost moves to 51200 Cost of Properties Sold; the unit becomes *Sold* and the contract shows the gross profit.

☐ Done Trainee: _____ Trainer: _____ Date: _____

MODULE 8

Maintenance, owners and documents

The maintenance team and the owner's maintenance dashboard, invoicing a managed property in the owner's name, keeping tenants' and contracts' documents with their expiry, and letting the system read scanned papers for you.

T32 Set up the maintenance team and complete a job

Role: Administrator, then maintenance engineer, then supervisor

Menu: System Setup ▸ Users · Operations ▸ My Maintenance Jobs **Time:** 25 min

1. As administrator, open `New User`: username **maint1**, display name "Ali (Maintenance)". Under Role select `Maintenance Engineer / Technician`, grant the practice company, `Save`.
2. Sign in to the tenant portal as Sara Ahmed (your trainer gives you the login). `New request`: Maintenance / repair, "Kitchen tap leaking", priority Normal, for Palm Residences Apartment 704. Send it.
3. Sign in as **maint1**. Only **Operations ▸ Tenant Services ▸ My Maintenance Jobs** is in the menu, and the new job is in the list.
4. Open the job. Select `Acknowledge — I have seen it`, then `Start work`.
5. Add material from the **maintenance store**: "Tap cartridge 35mm", qty **2**, unit cost **45**. Add a second item **bought for the job**: "Flexible hose", qty 1, cost 30 — first without a receipt number (refused), then with receipt PC-T32.
6. Write "Replaced the tap cartridge and the hose; no more leak." and select `Mark as done`.
7. Sign in as a supervisor (Handle Tenant Requests), open the job from **Operations ▸ Maintenance Jobs** and select `Close the job`.

EXPECTED RESULT

The job was assigned to Ali automatically. The timeline shows the request, first response, start and resolution times. The store item posted Dr 52100 Property Maintenance (Palm Residences) 90 · Cr 11650 Maintenance Materials Stock 90; the bought hose has no entry of its own (its receipt books it). Sara sees "Replaced the tap cartridge…" in her portal. Ali cannot close the job.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T33 Maintenance on hold for a tenant with an overdue invoice

Role: Leasing officer / accountant **Menu:** Tenant portal · Operations ▸ Customer Receipts **Time:** 10 min

1. Check that Omar Haddad has a posted invoice past its due date and not paid (your trainer sets one up if needed).
2. In the portal as Omar, open `New request`. A yellow notice says maintenance requests are on hold, with the amount overdue. Try to send a maintenance request anyway: it is refused with the same reason.
3. Send a request for **more time to pay** instead: it goes through.
4. Record a receipt for the overdue invoice in full (T7).
5. Back in the portal, open `New request` again and send the maintenance request.

EXPECTED RESULT

The hold appears only while money is overdue (or a returned cheque is not replaced) and lifts by itself once the receipt is posted. Staff can still raise a request for the tenant.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T34 Read the Maintenance Dashboard

Role: Owner / supervisor **Menu:** Controls ▸ Maintenance Dashboard **Time:** 10 min

1. Open the dashboard for the last 90 days.
2. Read the cards: jobs received, still open (and past target, unassigned), average first response, average time to complete, the share done within target, materials used and the maintenance store balance.
3. Choose technician **Ali (Maintenance)** and `Show`.
4. Look at **By property**: Palm Residences shows the 90 of materials from T32.

EXPECTED RESULT

T32's job counts as done within target (Normal: respond within 24 h, done within 5 days). The store balance is negative by 90 if no stock purchase has been booked yet — book one with a vendor bill to account 11650 and it turns positive.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T35 Invoice a managed property in the owner's name

Role: Master data owner, then accountant **Menu:** Master Data ▸ Properties · Operations ▸ Customer Invoices

Time: 15 min

1. Open Garden Villas (managed, landlord Khalid Rahman) in edit. Leave Owner TRN empty, tick **Invoice tenants in the owner's name** and `Save`.
2. Post the next draft rent invoice of the Garden Villas contract (from T3) and open it with `Tax Invoice`.
3. Open the **Reporting ▸ VAT Return** for the invoice's quarter.
4. Your trainer shows the same on a commercial managed property whose owner has a TRN.

EXPECTED RESULT

The document names Khalid Rahman as supplier, "c/o" the company, with the note that the company issues it as agent; as he has no TRN it is a plain invoice with no VAT. The invoice is not on the company's VAT return. For an owner with a TRN: 5% VAT, a number like OTI-<property>-2026-0001, and the VAT credited to 21500 Due to Landlords instead of 21400 VAT Payable.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T36 The owner's results: statement and profitability

Role: Accountant / owner **Menu:** Operations ▸ Owner Settlements · Reporting ▸ Owner Property Profitability

Time: 10 min

1. Take a store item for a Garden Villas maintenance job (as in T32): "AC capacitor", qty 1, cost 120. The job card says it is charged to the owner.
2. Open the Owner Settlements statement for Khalid Rahman.
3. Open **Reporting ▸ Owner Property Profitability** for the year to date.

EXPECTED RESULT

The material posted Dr 21500 Due to Landlords 126 · Cr 11650 120 · Cr 21400 VAT Payable 6, tagged to Garden Villas, with a recharge tax invoice under **Operations ▸ Recharges to Owners**. The statement lists it under "maintenance and expenses charged to the owner" and the owner's share is 126 lower. The profitability report shows Garden Villas' rent, our 5% commission, its VAT, the 120 of costs, the owner's net income and margin — and our commission as the company's income.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T37 Keep a tenant's Emirates ID and passport

Role: Master data owner **Menu:** Master Data ▸ Tenants · Master Data ▸ Document Expiry **Time:** 15 min

1. Open Sara Ahmed in edit and go to **Tenant documents** at the bottom.
2. Upload a scan or photo of an Emirates ID (your trainer provides a sample): type Emirates ID, leave number and dates empty, keep **Read the Emirates ID / passport** ticked, Upload.
3. Read the message, then look at the EID expiry field on the form.
4. Upload a passport with reading switched off: number P1234567, expiry a date last month.
5. Open **Master Data ▸ Document Expiry**.

EXPECTED RESULT

The ID number (if Sara had none), the expiry date and nationality were filled in; a different number already on file is reported, not overwritten. The passport expiry shows in red as expired on the form, and Sara's passport heads the Document Expiry list as expired.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T38 Attach the attested contract

Role: Leasing officer **Menu:** Master Data ▸ Leases **Time:** 5 min

1. Open the contract from T1. Under **Contract documents** it says no attested contract is on file.
2. Upload the PDF of the contract attested by the municipality: type "Attested contract (Municipality)", number RAK-ATT-T38.
3. Open Document Expiry again.

EXPECTED RESULT

The warning is gone and the count of running contracts without an attested copy is one lower.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T39 Read a scanned supplier invoice

Role: Accountant **Menu:** Operations ▸ Vendor Bills ▸ New **Time:** 10 min

1. On New Vendor Bill, use **Read a scanned invoice** with a supplier invoice from Coastal Facility Services (your trainer provides the PDF). Read invoice.
2. Compare every field with the document: supplier, their number, dates, each line's description, quantity and unit price, VAT, and the figures in the blue panel.

3. Choose any missing account, Save Draft, then post it.

EXPECTED RESULT

The bill's totals equal the invoice's. Warnings explain anything that differs (a discount line, an unknown supplier). Nothing is saved until you save.

☐ Done Trainee: _____ Trainer: _____ Date: _____

T40 Let the AI Assistant do the typing (optional)

Role: Any user with the assistant **Menu:** Assistant button **Time:** 15 min

1. Open the assistant: "Record a petty cash voucher of 150 for cleaning materials, paid to Al Noor Supermarket, receipt R-5531, property Marina Heights." Check the card and Confirm.
2. Open a New Vendor Bill, then ask: "Fill this in for Coastal Facility Services, invoice CFS-9, 12 AC filters at 150." Check the yellow fields and save it yourself.
3. Select the paperclip and attach the invoice from T39: the assistant repeats what it read.
4. Ask: "Open a new unit for Marina Heights, 7th floor, 1,250 sq ft, rent 82,000."
5. Ask: "What is the market rent for a 2-bedroom apartment in Al Marjan Island?"

EXPECTED RESULT

Only a click on Confirm or on the screen's Save button saves anything. The market rent answer gives sources with dates beside your own rents for the same kind of unit.

☐ Done Trainee: _____ Trainer: _____ Date: _____

APPENDIX A

Messages you may see, and what to do

Message or situation	Meaning	What to do
"... is closed. ... cannot be created, posted, changed or removed in a closed period."	The date falls in a closed month.	Date it in an open month, or ask for the month to be reopened (T26).
"Invoice ... has not been posted yet"	You are receiving money or clearing a cheque against a draft invoice.	Post the invoice first (T5).
"Bill ... has not been posted yet"	You are paying a draft bill.	Post the bill first.
"Journal entry is not balanced"	Debits and credits differ, or a line has both.	Check each line's figures.
"This voucher would take the float below zero"	Not enough cash in the petty cash float.	Replenish the float first.
"The unit is already taken for these dates by contract ..."	Another active or waiting lease covers the dates.	Check the dates, or end the other lease.
"The most that can be paid to ... is ..."	The landlord payment exceeds the balance.	Pay no more than the balance shown.
I saved it but it is not in the Trial Balance	It is a draft.	Post it from Journal Inquiry (0.3).
Reset to Draft is refused	Something depends on it (a receipt, a payment, a cleared cheque) or the month is closed.	Reset the later item first, or post a correcting journal.
"Maintenance requests are on hold for your account..."	The tenant has an overdue invoice or a returned cheque not replaced.	Collect the money or the replacement cheque; the hold lifts by itself (T33).
"No user carries out maintenance jobs yet"	Nobody has the Maintenance Engineer role, so jobs wait unassigned.	Create the maintenance user (T32); assign waiting jobs from the job card.
"Give the bill or receipt number the item was bought on"	A material bought for a job needs its bill or receipt.	Enter the bill or petty cash receipt number.
"No vendor matched ... Select the supplier, or create it first"	The scanned invoice's supplier is not in Vendors.	Choose the supplier, or create the vendor and read the invoice again.
"Check: the document reads ..., but the tenant record has ..."	The Emirates ID or passport number on the scan differs from the tenant's.	Check which is right and correct the tenant if needed.
A red light in the Closing Cockpit	A process for the month has not reached the ledger.	Use the line's Run button or open the screen named beside it.
