RealEstateManager

Your property portfolio, leases and accounts — in one system

Built for UAE property owners and managers: VAT, e-invoicing and post-dated cheques handled from day one

Prepared for: _____

Product presentation · October 2026

Running a portfolio on spreadsheets costs time and control

Scattered records

Leases, tenants and rent schedules live in separate spreadsheets that no one fully trusts.

Cheques tracked by hand

Dozens of post-dated cheques per building, followed in a register that never matches the bank.

Accounting done twice

Operations staff record it once; the accountant re-keys it into a separate ledger.

Late, uncertain month-end

Missed depreciation, unrecognised rent and VAT surprises found only after the figures go out.

One system where every action is also the accounting

Sign a lease, receive a cheque, pay a supplier — RealEstateManager writes the balanced double-entry journal for you.

Your team works in property terms. Your accountant gets a complete, audit-ready ledger.

100%

of postings created automatically and always balanced

3

VAT treatments chosen per unit: standard, zero-rated, exempt

1

screen to close the month, with a traffic light per task

Operations and finance together

Portfolio, leasing, collections, payables, assets and reporting share one database.

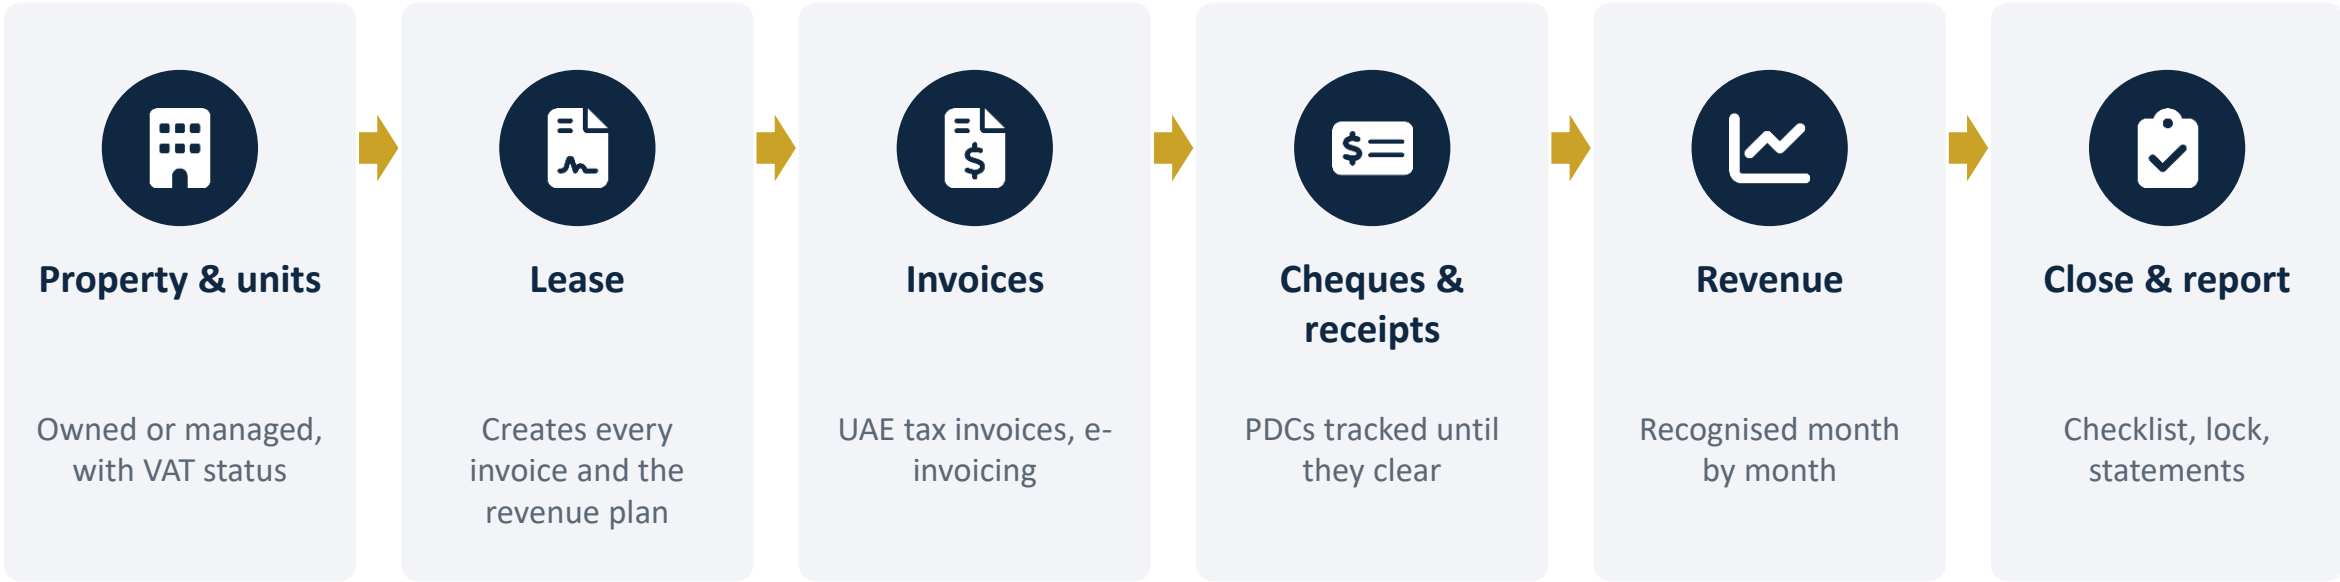

Made for the UAE

VAT and tax invoices, PINT AE e-invoicing, post-dated cheques, owned and managed property.

Control built in

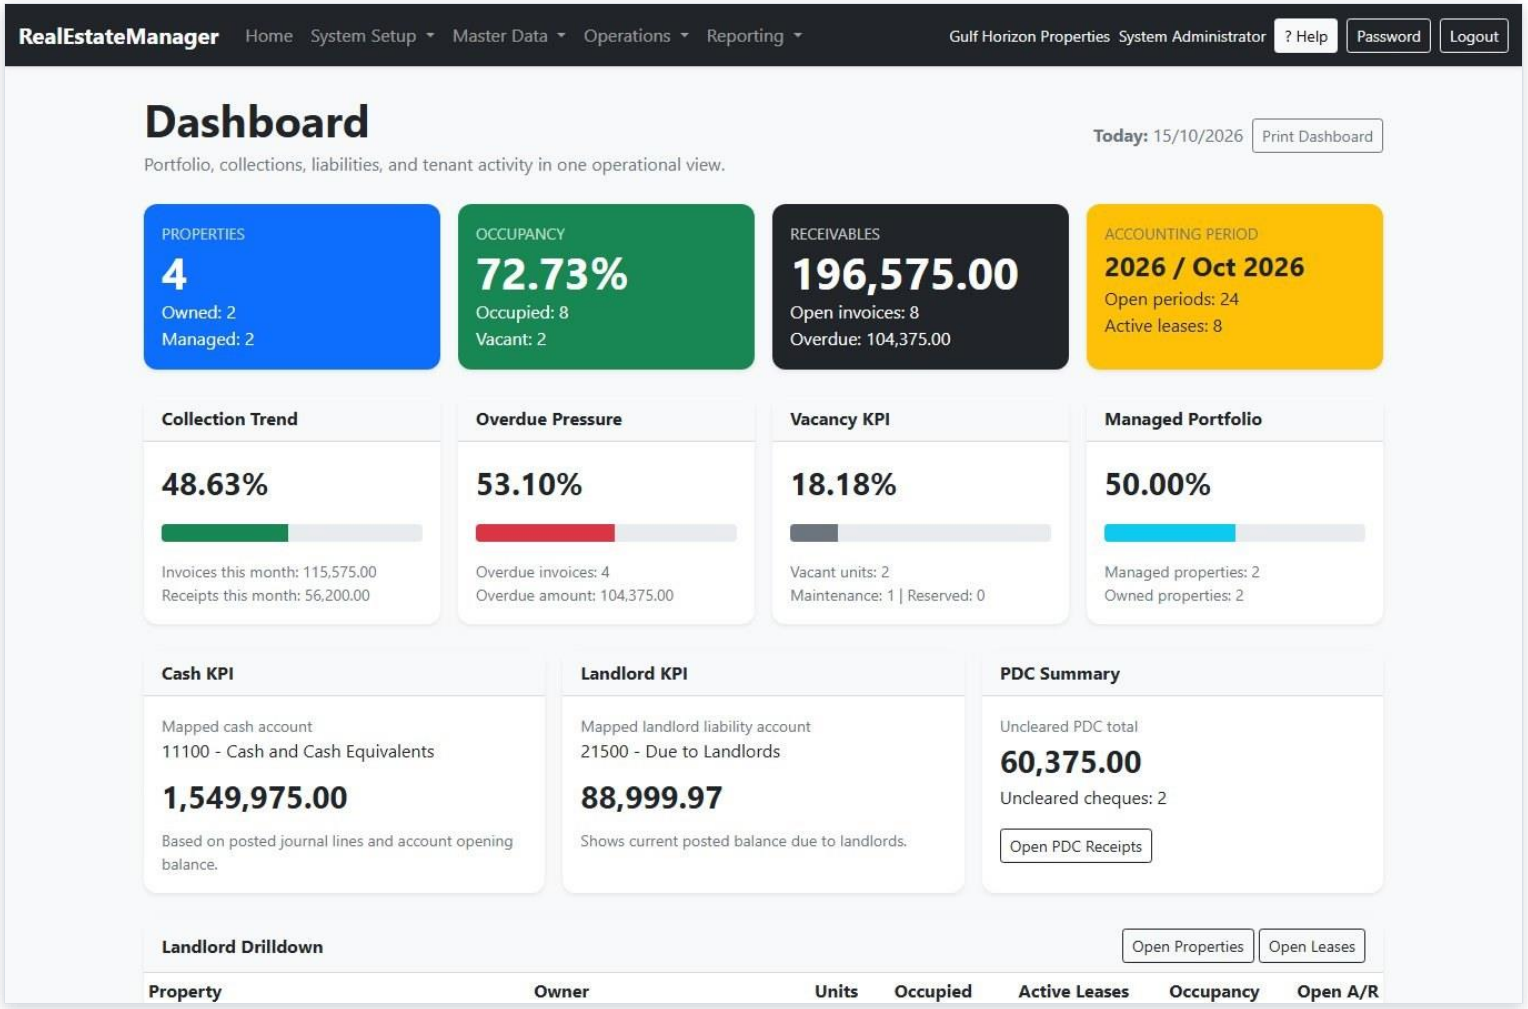

Permissions, four-eyes approvals, locked closed months and a full audit trail.

From signed lease to closed month, step by step

Every step posts its own journal automatically. Nothing reaches the reports until it is posted, and nothing can be posted into a closed month.

The whole portfolio at a glance

Occupancy and vacancy

Occupied, vacant, under maintenance and reserved units, live.

Collections and overdue

This month's billing against cash in, and what is overdue.

Cheques and cash

Uncleared PDCs, bank balance and what is owed to landlords.

Months not yet closed

Overdue closings and reopen requests waiting.

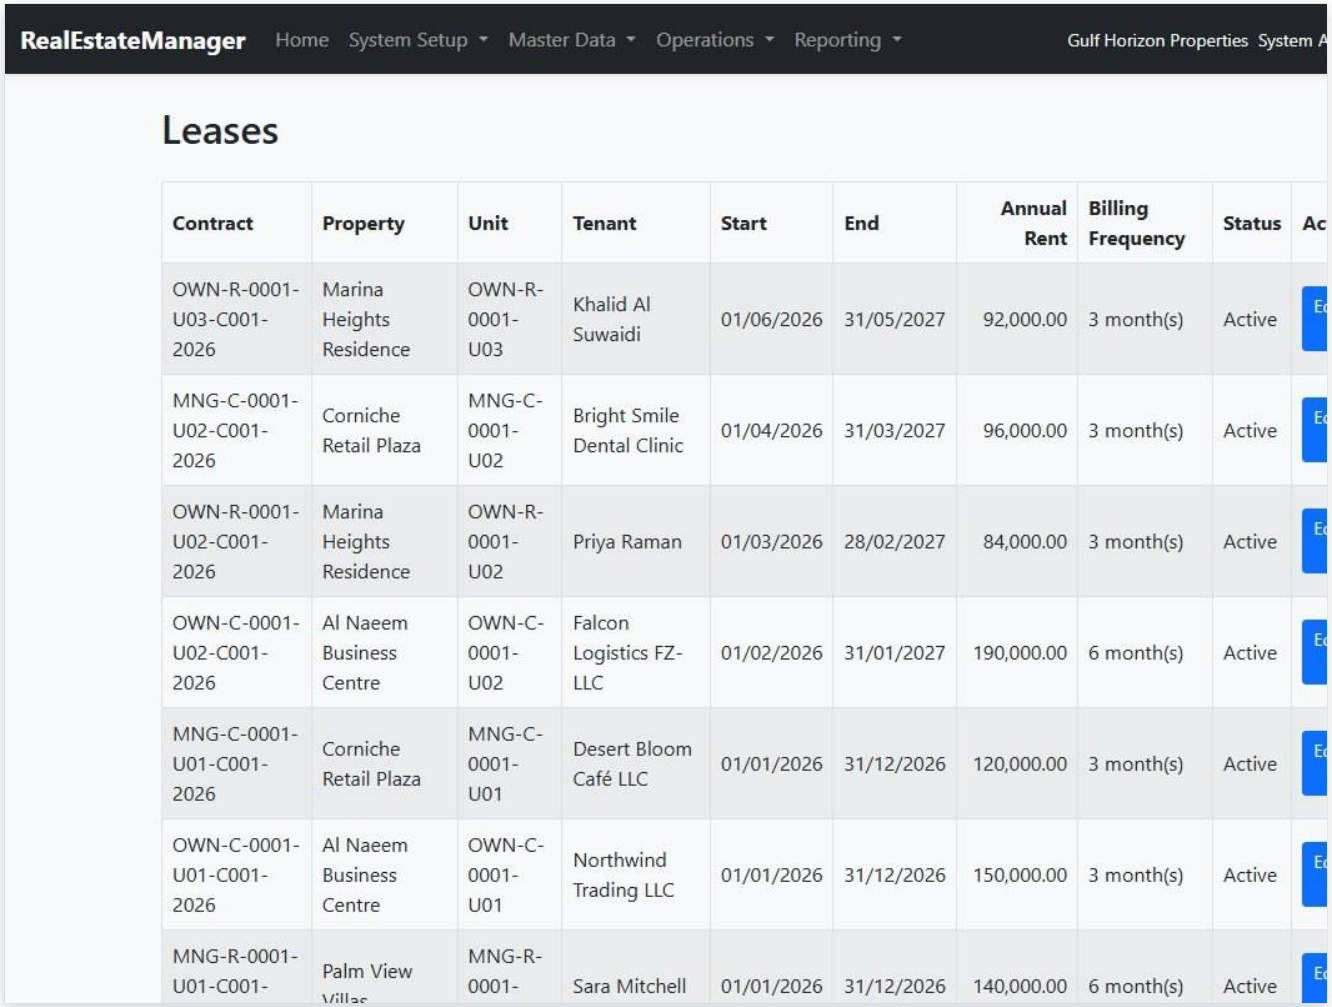

Leasing: one contract creates a year of work

Automatic schedules
Billing monthly to annually: every invoice and the monthly revenue plan are generated on approval.

Two-level approval
A second person approves each contract; nobody approves their own.

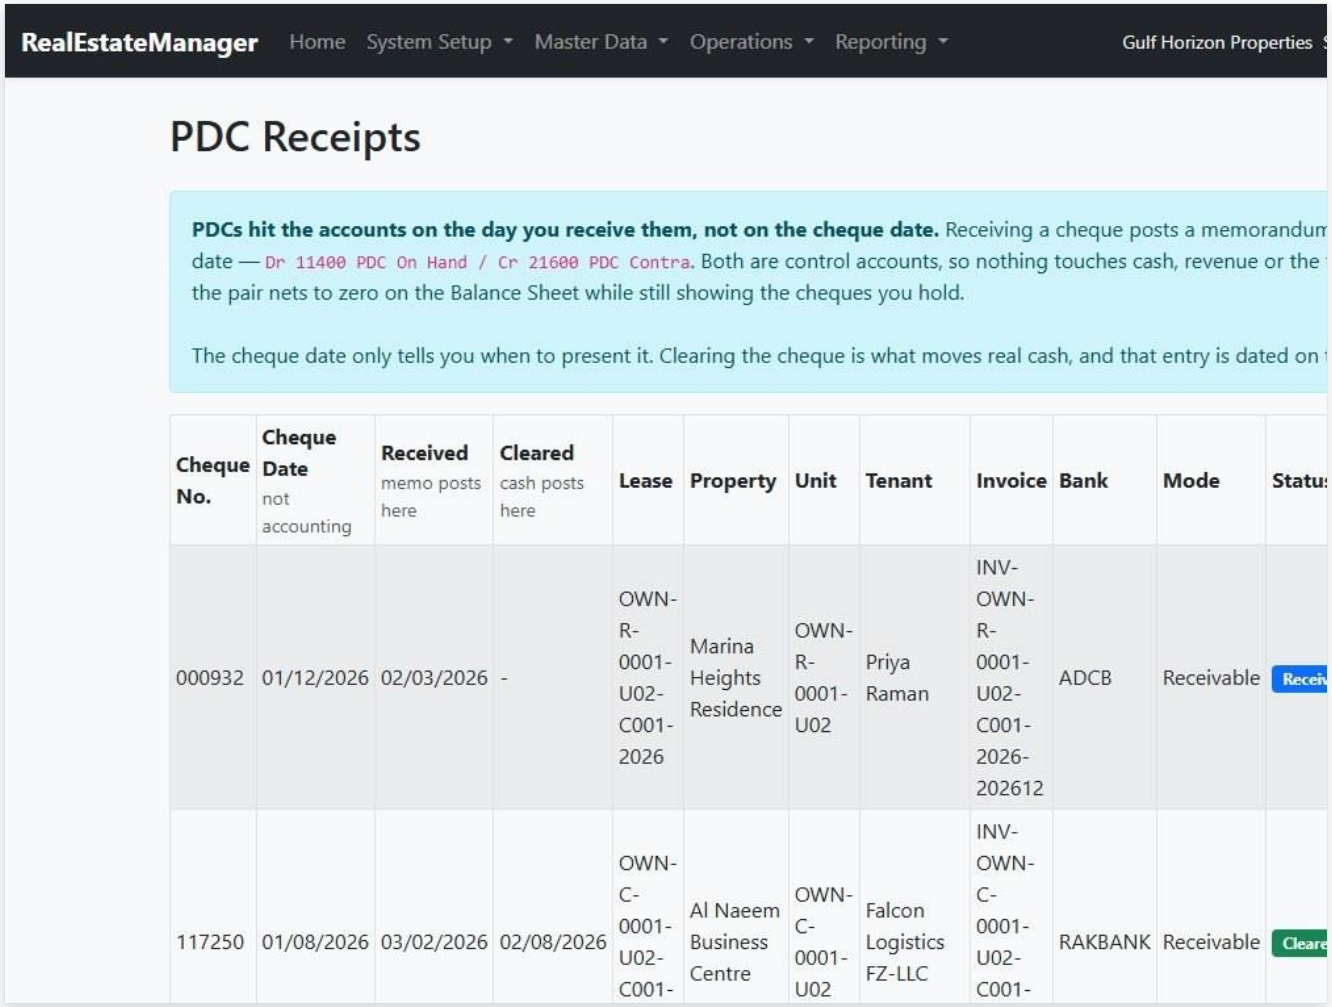

Smart contract codes
Codes show building, unit, tenancy and year; print the draft agreement and a QR label.

No double letting
A unit cannot be let twice for overlapping dates.

Contract	Property	Unit	Tenant	Start	End	Annual Rent	Billing Frequency	Status	Ac

Collections: every cheque followed until it clears

Post-dated cheques
Recorded when received, cleared when the bank honours them; each stage posts itself.

Receipts and part payments
Cash and transfers settle invoices, in full or in part.

Security deposits
Held as a liability, never mistaken for rent.

Tenant statements
Invoices, credits, receipts and the balance, ready to send.

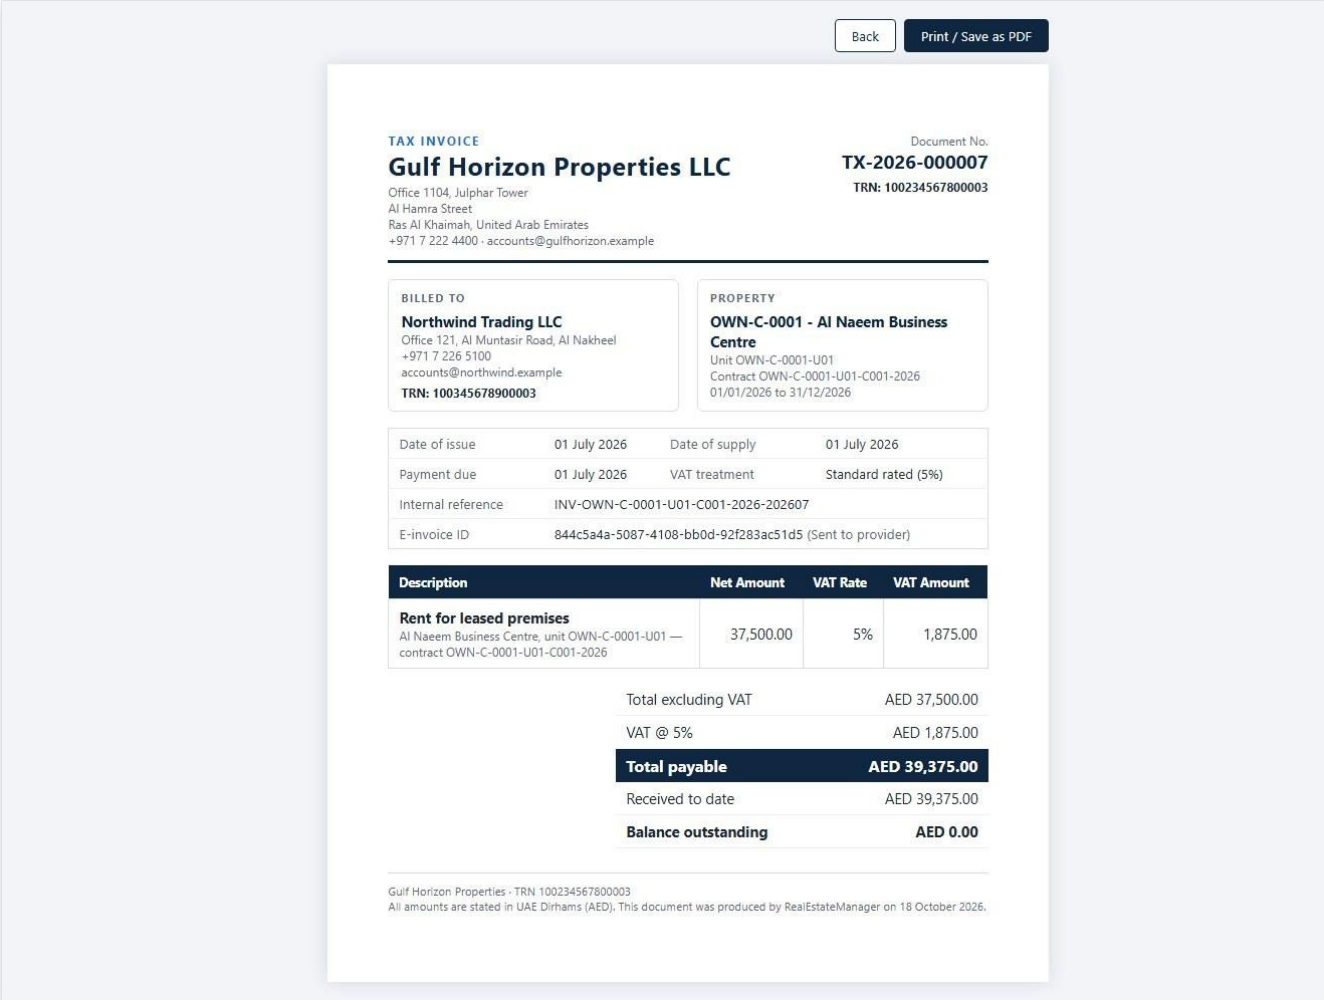

UAE VAT and e-invoicing, handled for you

Right VAT per unit
Commercial 5%, new residential zero-rated, later residential exempt — applied automatically.

Compliant tax invoices
One numbered series, both TRNs, simplified and full invoices, credit notes.

E-invoicing ready
PINT AE invoices queued to your provider; suppliers' e-invoices booked without retyping.

VAT return in one report
Output and input tax, recovery rate and the year-end wash-up.

Owned and managed properties, side by side

Owned

- Rent is your revenue, recognised month by month
- Profit and loss by property and by unit
- Investment property and depreciation tracked
- Development projects and unit sales (off-plan or completed)

Rent invoiced → **Unearned rent** → **Rental revenue**

Managed for landlords

- Rent is held for the landlord; only your commission is income
- Monthly commission tax invoices issued in one click
- Owner statement: rent billed, commission, VAT and balance
- Pay the landlord with a printed settlement advice

Rent invoiced → **Due to landlord** → **Your commission**

Suppliers, petty cash and assets in the same ledger

Supplier bills

Multi-line bills charged to each property; VAT follows the supplier's registration.

Supplier payments

Full or part payments, with a statement per supplier.

Petty cash

One float per site, vouchers, top-ups and a printable cash count.

Prepayments

Insurance or licences paid once, charged evenly month by month.

Fixed assets

Costs collected, capitalised and depreciated automatically.

Owner withdrawals

The owner's personal spending kept out of company expenses.

Close every month with confidence: the Closing Cockpit

October checklist

●	Rent invoices of the month issued	All 7 posted
●	Revenue recognition run	Ledger agrees: 74,781.66
●	Depreciation run	Not posted: Run depreciation
●	Prepayment amortisation	Ledger agrees: 4,800.00
●	Cheques due presented	2 cheques to clear — review
●	Ledger in balance	Debits equal credits

Red, amber, green per task

Each process is checked against the ledger. Red blocks the close; one click runs it.

Closed means closed

Nothing can be posted, changed or deleted in a closed month.

Reopen only on approval

A written reason, an approver's decision, and the full history kept.

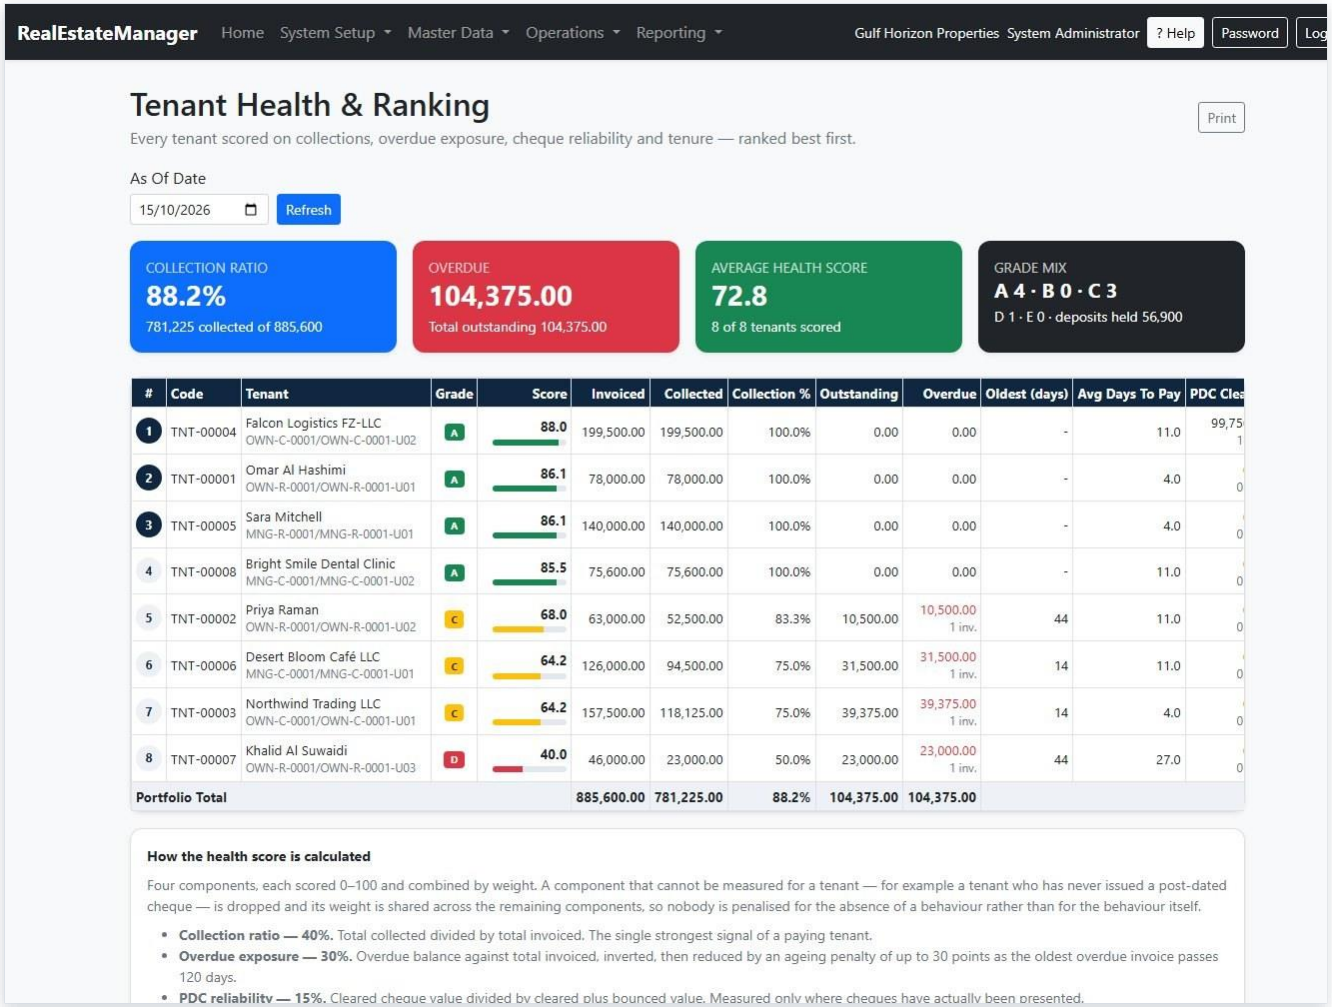

Year-end in one step

Revenue and expenses cleared to retained earnings; balances carried forward.

Reports for owners, managers and auditors

- Trial Balance
- Profit & Loss
- Balance Sheet
- Cash Flow Statement
- General Ledger
- VAT Return
- P&L by Property
- Property Utilization
- Tenant Health Ranking
- Tenant Statements
- Supplier Statements
- Owner Tenancy Schedule

Financial statements (blue) and management reports (gold) — every one printable

A self-service portal your tenants can use on their phone

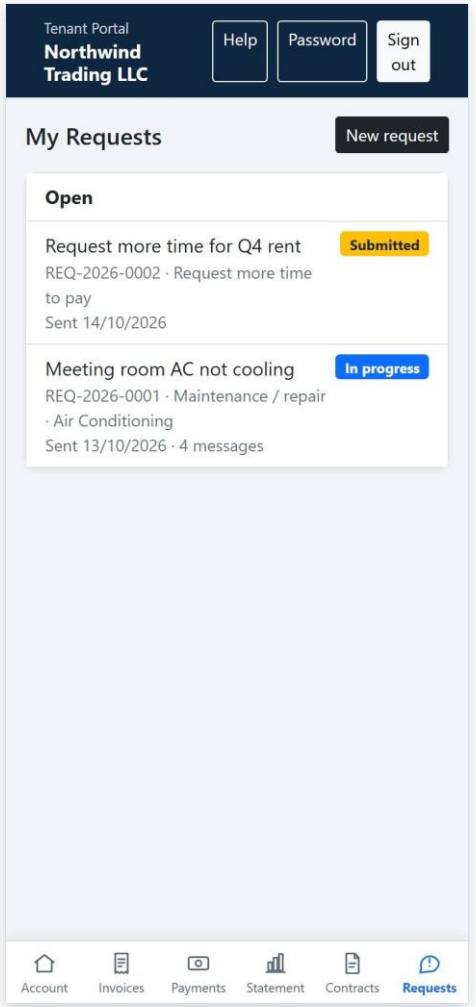

Their account, any time
Invoices, payments, statement and contracts, on any phone.

Maintenance requests
Tenants raise and follow requests; your team answers from one queue.

More time to pay
Postponement requests decided and applied without changing the accounts.

Fewer calls
Replies are visible in the portal; internal notes stay internal.

Security and control you can show an auditor

Permissions by role

Leasing, accounting, approvals and reports granted separately.

Four-eyes approvals

Contracts and period reopening need a second person.

Locked periods

Closed months cannot be changed by anyone.

Full audit log

Who did what and when, for every screen.

Several companies

One sign-in, separate books for each company.

Hosted and backed up

Secure web access from office or home; nothing to install.

Getting started is simple

1

Set up

Company, chart of accounts, properties, units and tenants.

2

Bring your balances

Opening balances, open invoices and cheques on hand.

3

Train your team

Practice company, training workbook, videos and in-screen help.

4

Go live

Start with the next month; close it in the Closing Cockpit.

Try it free for 15 days

Your own company in the system, ready to explore with sample data, a full user manual and a step-by-step training workbook.

Thank you

Questions, a live demonstration, or your 15-day trial — we are ready when you are.
